

CAP AT HOME APP

THE **SMART WAY** TO MANAGE YOUR SECURITY SYSTEM

Only primary keyholders are able to register for the app and thereafter can add family and staff members to the app.

If you need armed response at home, **push the app-based panic button on your phone.**

Confirmation directly through the app dispatches the vehicle closest to your property, for an even smarter response.

- Receive important information about your at home security
- You can even see where in your home the trigger came from/ originated
- Cancel false alarm/load shedding activations
- Push notifications will inform you if your battery level is low
- And if there are possible threats in your area
- Set holiday instructions
- Test your alarm
- Request a technician
- Request fire or medical emergency services to your home/property
- Arrange meet and greet
- Arm or disarm your alarm
- (Alarm system dependent)

CAP APP

YOU'VE GOT **BACKUP**

An app-based panic button you can use to call for help from your cellphone - anytime, anywhere. We will respond to the panic signal and dispatch help to your phone's location.

RIDE

1. Choose a location
2. Input your departure time and we'll calculate how long it should take to get there or input your arrival time.
3. Describe the vehicle (this helps us in the event we need to find you)
4. Add participant contacts
5. Add any details that might help us locate you
6. Set up a security code to verify your ride is completed. When your ride is complete you'll be asked to enter the code. If you don't, or the code is incorrect, we'll send help.

MEET

1. Choose your meeting location
2. Input your start, duration and arrival time
3. Add participant contacts
4. Set up a security code that you will enter to complete the meeting. If you don't, or the code is incorrect, we'll send help.
